NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended July 31, 2022

1. CORPORATE INFORMATION AND GOING CONCERN UNCERTAINTY

Corporate information

Quest PharmaTech Inc. (“Quest” or the “Company”) is a publicly traded, Canadian based pharmaceutical company developing products to improve the quality of life. The Company is developing targeted cancer therapy with its lead product (MAb AR9.6), under development for a novel target (truncated O-glycans on MUC16) discovered at University of Nebraska Medical Center.

The Company also holds an equity interest in several companies, including a 42.52% equity interest in OncoQuest Inc. (“OncoQuest”), a private Canadian biotechnology company developing next generation of combinatorial immunotherapy products for the treatment of cancer. OncoQuest’s technology platform included a panel of tumor antigen specific monoclonal antibodies of the immunoglobulin G (“IgG”) and E (“IgE”) class targeting CA125, MUC1, PSA, Her2/neu, CA 19.9 and TAG72; and the application of combinatorial immunotherapy to enhance tumor specific immunity and clinical outcome. On April 22, 2020, OncoQuest announced a definitive agreement to sell its drug portfolio to Dual Industrial Co., Ltd. (renamed as OncoQuest Pharmaceuticals, Inc or “OQP Korea” in May, 2020) in exchange for OQP Korea bonds and cash with a notional value of US\$308.4 million and a commitment to fund the Oregovamab Phase 3 Clinical Trial. The asset transfer agreement (“ATA”) transaction completed its second closing in February 2021 and as a result all legal title and registrations for OncoQuest’s immunotherapy assets were transferred to OQP Korea. In return, OncoQuest received US\$125 million of OQP Korea bonds convertible into OQP Korea shares, US\$8.4 million in cash, and an OQP Korea unsecured 1% interest bearing corporate bond for USD\$175 million, exchangeable into 65,229,709 shares of OQP Korea with an ascribed notional value of US\$175 Million subject to regulatory approval. As the requisite approvals have not yet been received and the trading in the shares of OQP Korea has been suspended on the KOSDAQ Exchange in March 2021, OncoQuest management are working with OQP Korea management to resolve these issues as quickly as possible and monetize the consideration received in the transaction with OQP Korea. In May 2021, OQP Korea determined to spin out the biotechnology business, comprised of the immunotherapy assets, into a separate company that will pursue a public listing on a different exchange. In August 2021, the reorganization was implemented, and OQP Korea’s biotechnology business assets were transferred to OQP Bio, Inc. (Korea), a private Korean company. In January 2022, OncoQuest issued an in-kind dividend of OQP Bio bonds to its shareholders, including to Quest. The dividend received by Quest has a face value of KRW129.1 billion and an estimated fair value on July 31, 2022, of Cdn\$80.2 million.

Other equity investments for Quest include an 10.67% interest in OncoVent Co., Ltd., a China-based global pharmaceutical company focusing on the development, manufacturing and commercialization of Cancer Immunotherapy Products within China with pancreatic cancer as its first target; and Bioceltran Co., Ltd. (“Bioceltran”), a Korean company developing skin penetrating active molecules for cosmetic and pharmaceutical use. Quest has worldwide (excluding South Korea) rights to Bioceltran PTD Technology and Products for certain indications and Bioceltran has an exclusive license to Quest’s Photodynamic Therapy Technology.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended July 31, 2022

1. CORPORATE INFORMATION AND GOING CONCERN UNCERTAINTY [CONTINUED]

The Company's head office is located at 8123 Roper Road NW, Edmonton, Alberta, Canada T6E 6S4 and it is incorporated under the Business Corporations Act (Alberta). The Company's functional currency is the Canadian dollar. The Company is publicly traded on the TSX Venture Exchange under the symbol "QPT".

These consolidated financial statements have been authorized for issue by the Company's Board of Directors on September 26, 2022.

Going concern uncertainty

The Company's consolidated financial statements have been prepared on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The Company has experienced significant cash outflows from operations since its inception.

While the Company has reported a net loss of \$1,662,238 for the six months ended July 31, 2022 (year ended January 31, 2022 - net loss of \$85,088,910) and a shareholders' equity of \$88,965,737 (January 31, 2022 - shareholders' equity of \$90,405,975), the Company has consolidated cash reserves of only \$518,765 at July 31, 2022 (January 31, 2022 - \$264,340) and as at July 31, 2022 had a working capital deficiency of \$491,582 (January 31, 2022 - working capital deficiency \$357,937). In addition, in March 2021, trading in the shares of OQP Korea was suspended on the KOSDAQ exchange which impacts the ability of OncoQuest to monetize the OQP Korea bond consideration received by OncoQuest under the ATA, to pay for the costs of the ATA transaction including Canadian income tax and to distribute any ATA net proceeds to its shareholders, including Quest. Accordingly, there is a material uncertainty that may cast significant doubt regarding the Company's ability to continue as a going concern.

The Company's ability to continue as a going concern is uncertain and is dependent upon its ability to raise additional capital to successfully complete its research and development programs, commercialize its technologies, conduct clinical trials and receive regulatory approvals for its products, and upon the ability and timing to monetize the consideration received in the transaction with OQP Korea. It is not possible at this time to predict the outcome of these matters. The Company's consolidated financial statements do not reflect any adjustments to the classifications and carrying values of assets and liabilities, or to the amounts reported as earnings per share, that may be required should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business. The Company intends to address this uncertainty through new share or debt issuances, licensing arrangements and/or strategic partnerships.

ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's exposure to liquidity risk is dependent on its ability to raise funds to meet its commitments and sustain its operations. The Company controls liquidity risk by managing its working capital and by securing additional funds through equity, debt or partnering transactions (see Capital Disclosures, note 6). The Company only has cash reserves of \$518,765 at July 31, 2022 (January 31, 2022 - \$264,340). As such, there is a liquidity risk for the Company at July 31, 2022.

iii) Credit risk

Financial instruments that subject the Company to credit risk consist primarily of cash and short-term investments and accounts receivable. To minimize its exposure to credit risk for cash and short-term investments, the Company invests surplus cash in short-term deposits that are fully guaranteed by the Company's financial banker, a major Canadian chartered bank. As the Company is a research and development company, the Company's exposure to credit risk related to accounts receivable is not considered to be significant. At period end, 100% of accounts receivable was due from a federal government agency.

iv) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and financial liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company's cash and short-term investments are comprised of highly liquid deposits that earn interest at market rates. Accounts receivable and accounts payable bear no interest. The Company manages its interest rate risk by maximizing the interest income earned on excess funds while maintaining the liquidity necessary to conduct operations on a day-to-day basis. The Company's policy limits the investing of excess funds to liquid government guaranteed deposits or guaranteed investment certificates.

Bond name	Face Value (KRW)	Applied discount	Fair value (KRW)	Fair value (Cdn)
OQP Bio bond # 10	20,415,802,312	0.00%	20,415,802,312	21,518,256

	129,090,021,194		76,108,358,650	80,218,210

Quest, with advice from independent valuation advisors, used a discount rate of 59.35% to fair value the OQP Bio corporate bond, due to the uncertainty regarding the ability to redeem the OQP Bio corporate bond for cash or shares of OQP Bio. As well, Quest used an exchange rate of 948.767 KRW to 1 Canadian dollar, the exchange rate on January 14, 2022 when the dividend was issued, for all of the OQP Bio bonds, to arrive at an estimate of fair value in Canadian dollars. As the OQP Bio bonds are denominated in KRW, the value of the bonds in Canadian dollars may be subject to exchange rate fluctuations. Since OQP Bio is a private company, with limited liquidity, Quest is negotiating to exchange the OQP Bio bonds for bonds or shares of Canaria Bio M, a Korean KOTC traded company.
